EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

On 16 November 2009, a proposed amendment in condition for allowance was discussed with Ms. Mary Wilson, applicants' attorney, in a telephone interview. Authorization for this examiner's amendment was given in a telephone interview with Ms. Mary Wilson on 16 November 2009.

The claims have been amended as follows:

Claim 70. Delete the phrase "General Formula (I)," in line 2 and delete the phrase "General Formula (I)" below the structure shown in the claim.

Claim 73. Delete the phrase "of General Formula (III)" in line 1 and delete the phrase "General Formula (III)" below the structure shown in the claim.

Information Disclosure Statement

The information disclosure statement (IDS) dated 10 August 2009 complies with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609. Accordingly, it has been placed in the application file and the information therein has been considered as to the merits.

REASONS FOR ALLOWANCE

Applicants' Amendment and Remarks filed on 26 May 2009, in which claims 1, 4 and 5 are amended to change the scope and breadth of the claims, Applicants' Supplemental Amendment and Remarks filed on 20 August 2009 in which claims 1-24 were cancelled, and new claims 25-47 are added, Applicants' Supplemental Amendment and Remarks filed on 22 September 2009 in which claims 1-47 were cancelled, and new claims 48-69 are added, and Applicants' Supplemental Amendment and Remarks filed on 10 November 2009 in which claims 1-69 were cancelled, and new claims 70-91 are added, is acknowledged.

Claims 70-91 are pending in the instant application.

In view of the allowability of claims drawn to the elected species, the requirement for a species election (insofar as they are applicable to the instant claims), as set forth in the Office Action mailed 17 June 2008, is hereby withdrawn. The search has been extended to include the non-elected species of the instantly claimed invention and the full scope of the claims is found to be allowable.

The following is an examiner's statement of reasons for allowance: The instantly claimed methods, drawn to a method of inhibiting bacterial growth comprising contacting a bacteria with a disaccharide bearing the Glc β (1-3) 1-deoxy-Gal structural core unit, as shown in the instant claims, are not seen to be taught or fairly suggested in the prior art, as discussed below.

In view of the cancellation of claims 1-69, all objections made with respect to claims 1-69 in the previous Office Action are withdrawn. These objections have been **withdrawn**.

In view of the cancellation of claims 1-69, all rejections made with respect to claims 1-69 in the previous Office Action are withdrawn. These rejections have been **withdrawn**.

The closest prior art reference is WO 97/34623 to Sofia *et al.* (IDS dated 10 August 2009). Sofia *et al.* disclose lipoglycopeptides as inhibitors of bacterial peptidoglycan synthesis. The lipoglycopeptide compounds have the structure as in general formula (I) (p. 15-17). General formula (I) encompasses all disaccharides with an infinite number of possible linkages and stereochemistry. Specific disaccharides include those as shown on p. 81. Based on the guidance provided in the disclosure of Sofia *et al.*, one would not have arrived at the compounds of the instantly claimed invention, which contain a 1-deoxy disaccharide. See MPEP § 2144.08, which states

"... any teaching or suggestion in the reference of a preferred species or subgenus that is significantly different in structure from the claimed species or subgenus...may weigh against selecting the claimed species or subgenus and thus against a determination of obviousness. *Baird*, 16 F.3d at 382-83, 29 USPQ2d at 1552 (reversing obviousness rejection of species in view of large size of genus and disclosed "optimum" species which differed greatly from and were more complex than the claimed species)." One of ordinary skill in the art would clearly recognize that such differences between the compounds used in the claimed method and those taught by Sofia *et al* are significant and not non-obvious variants, particularly since the method used for the synthesis of the disclosed species taught in Sofia *et al*. would not result in the 1-deoxy disaccharide compounds as instantly claimed.

Exemplary methods for bacterial inhibition of a variety of bacterial strains, using numerous compounds of General Formula (I), are disclosed in the instant Specification. Accordingly, the Examiner's Amendment is sufficient to place the application in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
